

MEDICAL MALPRACTICE CLAIMS

Over the years, our group of experienced attorneys has had great success in handling medical negligence cases. We have resolved cases and collected millions of dollars on behalf of our clients. We have successfully handled cases involving birth trauma, cerebral palsy, drug poisoning, surgical errors, and wrongful death, and failure to diagnose cancer, strokes and impending heart attacks. To read about some of our great results on behalf of our clients, click on [Recent Successes](#).

We also have former defense counsel, an attorney who represented defendants, and an attorney who performed claims work. This combination gives us greater insight into the process and a deeper understanding of how to prepare and resolve a case. Our experience and location near several preeminent medical schools and teaching hospitals positions us to provide continuing success for our clients.

Medical negligence cases involve complicated and sensitive matters. For a free initial consultation or to get answers to basic questions, please call us toll free at 1-800-233-2890 or at (301) 230-5200. We will keep your call confidential and give you our evaluation of your case.

If you have a question about a claim against the government, click [Claims Against The Government](#). You may also look at our recent successes in that area after going to that page. For information about other injury claims, click [Personal Injury](#).
