

Intellectual Property Ownership and Protection Strategies

We help clients secure, protect, and enforce their intellectual property through:

- Intellectual property clearance searches
- Intellectual property audits and website reviews that discover intellectual property that a client may own and not even know it, and that identify potential areas of concern regarding ownership and infringement
- Trade secret identification, development, and protection counseling and strategies
- Non-disclosure agreements
- U.S. and international trademark registration and maintenance
- U.S. and international copyright registration
- Coordination with patent prosecution counsel to align with business objectives and overall IP portfolio
- IP portfolio management, including development of a worldwide protection strategy

Trademark and copyright registrations are available on a flat fee basis. Ask us whether your matter qualifies before we get started.
